

Power Unit Specifications

VACUFLO's power units are engineered to match a home's square footage and are available for homes up to 18,000 sq. ft. Each unit is designed for powerful and quiet operation. The power units are constructed of steel and finished with a tough powder-coating that resists chipping, rusting and scratches. Most models feature a clear dirt canister so you can see when it needs emptying.

True Cyclonic Power Units

VACUFLO True Cyclonic Power Units provide sustained cleaning power by separating the dirt from the airflow without the use of bags or filters! The powerful cleaning performance will not decrease as dirt accumulates.

True Cyclonic is our tried and true power unit- bagless, filterless and a work horse of a central vacuum. With a 6-gallon dirt canister and the unit being exhausted outside the home, minimal maintenance is needed throughout the year. It is suggested that every 4-6 months, empty the dirt canister and clean the permanent filter screen to promote maximum air flow to the motor allowing for consistent power and worry-free operation each and every time you vacuum.

VACUFLO True Cyclonic

VACUFLO's True Cyclonic Power Units require no bags or filters. Cyclonic Filtration Technology deposits 96-98% of all vacuumed debris in the dirt canister with the remaining fine dust particles exhausted outside. The result is a cleaner home with cleaner air. The True Cyclonic systems maintain maximum cleaning efficiency with consistent power and airflow.

- No bags or filters needed
- Required to be exhausted outside
- Wide range of units to accommodate any home size
- Large capacity dirt receptacle
- Removes 100% of vacuumed dirt, dust, allergens and debris from the home
- Assembled in Canton, Ohio by H-P Products, a trusted name in the industry
- Provides for whole-house cleaning with one simple system

Model	Recommended Home Size (Sq.m.)	Sealed Vacuum (H ₂ O Lift)	CFM (L/sec)	Max Air Watts*	Volts	Max/Avg. Amps**	Collection Capacity (Liters)	Level of Quietness (Decibels)***
288	up to 310	2846 mm	52	485	230	7.3/5.5	21	67.1 dB _A
488Q	up to 465	3175 mm	57	500	230	7.5/5.9	23	61.0 dB _A
588Q	up to 743	3556 mm	59	630	230	8.0/6.5	23	61.5 dB _A
780	up to 1,125	2921 mm	102	824	240	13.8/11.7	23	67.8 dB _A
980	up to 1,672	3150 mm	107	990	240	14.0/12.5	51	70.9 dB _A
MaxAir	up to 2,044	5283 mm	58	903	240	13.8/13.0	23	71.1 dB _A

* ASTM recognizes air watts as air power and is defined as "above the floor cleaning potential."

** Maximum amps refer to the potential amount of current if the power unit is running in a stand-alone situation. (No tubing or accessories attached). Average amps refer to the actual amount of current used when the power unit is in typical operation (installed, with accessories attached).

*** ASTM draft F11.50.07 test method was used to determine dB_A ratings. Sound levels were measured at 6' from the power unit. All power units were exhausted outdoors.

Turbine Powerhead

Turbine Powerhead has been engineered for high performance, quiet operation and superior cleaning ability. It has been carefully designed and manufactured for long life, reliable performance and convenient cleaning. It requires no electricity because it runs off the airflow of your central vacuum system. The Turbine Powerhead moves easily and does not require downward pressure for thorough cleaning.

TurboCat Zoom

- Powerful, air-driven powerhead that harnesses the power of your central vacuum system for deep, thorough cleaning.
- Engineered with exclusive Z-Tech Design features including the Vac-N-Groom Brush Roller, Multi-port Baseplate, Silent Drive Belt, Run-Silent Bearings, Soft Pro-Tech Bumper, Easy-Glide Rollers and Large Intake Port.
- Remove embedded dirt and dust while easily maneuvering the lightweight TurboCat Zoom.
- Requires no power cords, batteries or additional electricity.

Benefits of Owning a VACUFLO Central Vacuum System

- Quality products, great service and a trusted name since 1948, and it's all backed by the best Limited Lifetime Warranty in the industry!
- 100% of ALL vacuumed dirt, dust and allergens are removed from the living space and leaves no "vacuum smell," perfect for families with allergy and asthma sufferers, or pets.
- Exclusive patented Cyclonic Filtration Technology[®] provides maximum power, filtration and consistent cleaning performance every time you vacuum.
- Convenient whole-house cleaning with just one simple system. VACUFLO offers a wide selection of accessories designed to clean all interior surfaces, floorings, carpets, furnishings and window treatments; also ideal for garages, campers and boats, too!
- Depending on your preference, both Turbine and Electric Powerheads are available to help you maintain a clean, healthy home with effortless cleaning.
- With an extensive product line, VACUFLO can match the right system to any home size, design or budget.
- Unlike portable vacuums that need to be replaced every few years, VACUFLO central vacuums have a much longer life expectancy to provide you with a reliable performance, year after year and a Limited Lifetime Warranty that ensures it!
- VACUFLO central vacuums add resale value to your home, extend the life of carpets and furnishings and saves time while improving your indoor air quality!

Green Information

Today's environmentally conscious homeowners are demanding and getting improved energy efficiency, better indoor air quality and smarter use of building materials. These "green" building initiatives not only protect the environment, but also improve comfort and boost home value.

VACUFLO central vacuums have a unique role to play in "green" homes by removing 100% of vacuumed dirt, dust and allergens, with no recirculation of particles back into the living area they ensure healthy indoor air and reduce the discomfort of allergy sufferers by more than 60%.

Unlike upright vacuums, which are often discarded after only a few years, VACUFLO central vacuum systems keep up worry-free cleaning for decades, ensured by our Lifetime Limited Warranty. The only thing you are discarding is dust.

VACUFLO helps to fight noise pollution by featuring sound dampening designs that keeps homes peacefully quiet. Optional air-driven turbines that operate solely on the power of your system are available, with no additional electricity needed.

Organizations like Earth Advantage® and the US Green Building Council with its LEED®, (Leadership in Energy and Environmental Design) Rating System are providing standards and certification to ensure that best practices are followed across the country.

Central Vacuum Systems that are exhausted to the outside earn 1 point in the LEED-H standard and 3 points in the NAHB Green Building Standard.
